Project Proposal

Course code: CSE 2200

Course title: Design Project-I

Submitted to: Niaz Ashraf Khan
Lecturer
Department of Computer Science & Engineering

Date of submission: 3rd July 2022

Project Name: HealthX   *(undecided)*

Group Members:

1. Souvik Ahmed   [ID-203014004]
2. Muhesena Nasiha Syeda   [ID-203014015]

Project Description:

HealthX is a program that reminds the user to do certain activities which contributes to the well-being of the person. Upon accomplishing the healthy activity, points are awarded.

Features:

- The program will have a log in system for users.
- There will be a leader board system to see the distribution of points of other users.
- The accumulated points from doing the healthy activity can be used to roll for items and consumables from a database of items in a lottery system.
- The obtained items or consumables can be equipped or consumed to buff yourself for a period of time or permanently, like a game.
- Items can be traded among users through the use of a market place.
